e-Science in operation

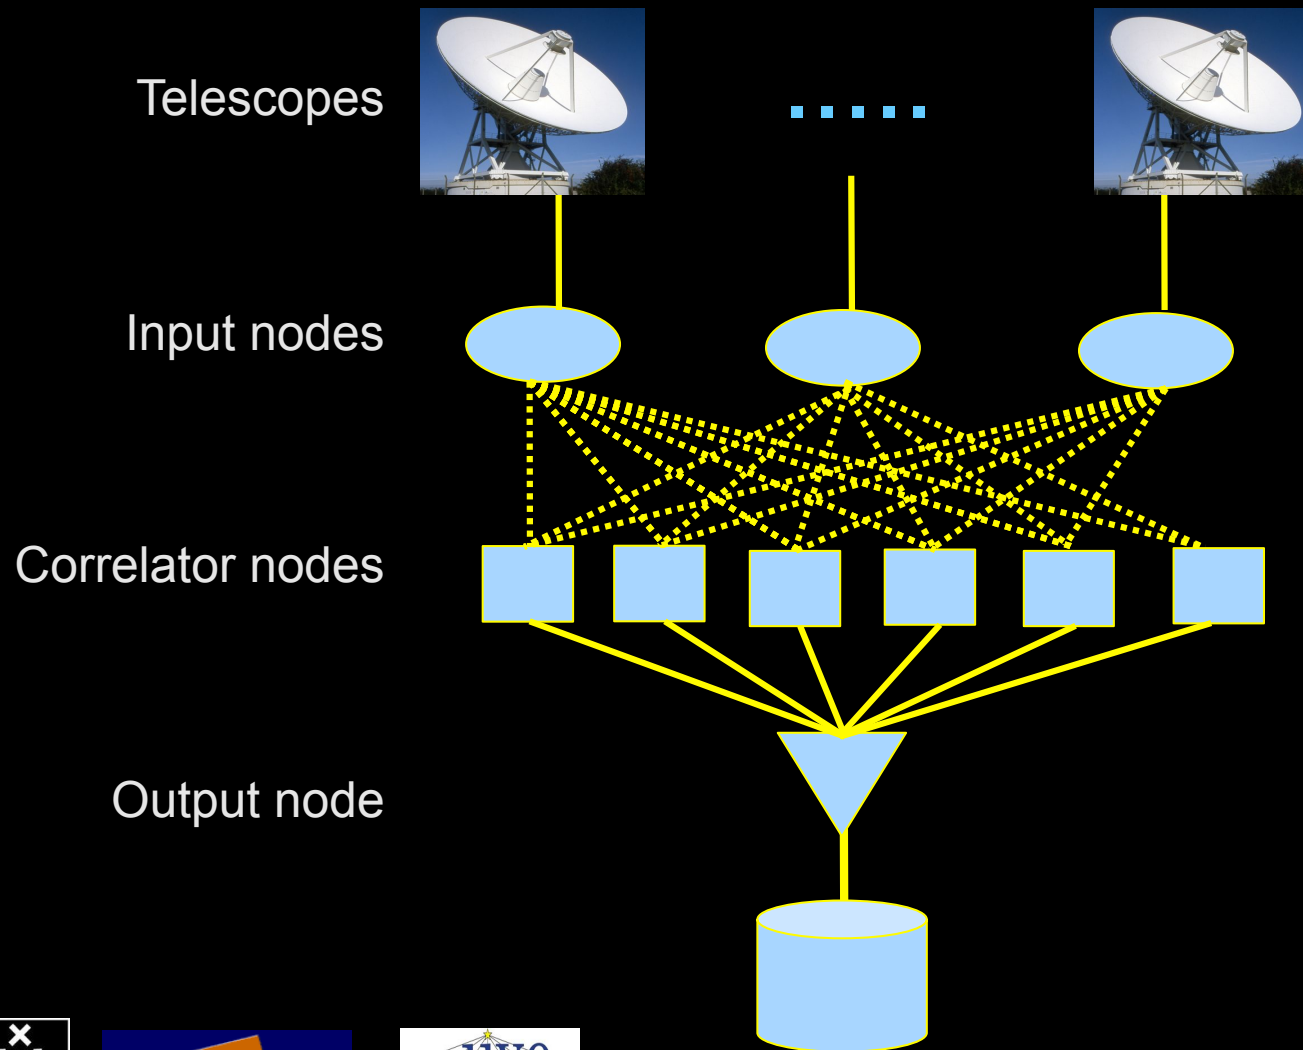

LHC Data Grid Hierarchy

CMS as example, Atlas is similar

The SCARIE project

SCARIE: a research project to create a Software Correlator for e-VLBI.
VLBI Correlation: signal processing technique to get high precision image from spatially distributed radio-telescope.

To equal the hardware correlator we need:

16 streams of 1Gbps

16 * 1Gbps of data

2 Tflops CPU power

2 TFlop / 16 Gbps =

1000 flops/byte

THIS IS A DATA FLOW PROBLEM !!!

The "Dead Cat" demo

1000000 flops/byte

SC2004,
Pittsburgh,
Nov. 6 to 12, 2004
